

SYSTEMS OF SANIFICATION FOR ROOMS

SANI-MOVE

PNR ITALIA FOR SANIFICATION AND DISINFECTION

The SANI-SYSTEM product range uses the new technology of PNR Italia specifically designed to make environments and surfaces safer.

SANI-MOVE is the new PNR Italia system designed for the practical and simple sanitization of offices, shops, and small/medium-sized premises.

Depending on the type of environment it is possible to adjust the pressure of the air and the percentage of nebulised liquid to meet the different hygiene needs, without leaving residues on objects and fabrics (times and liquids must be used correctly, see instructions + data sheet).

SANI-MOVE is an easy to transport, easy to handle trolley, built with a structure entirely of stainless steel.

The pressurized steel tank is positioned on board the structure and has a capacity of 9 litres of sanitising liquid (liquid not included). The built-in compressor ensures constant operating pressure for continuous use.

An ultrasonic atomization system connects the tank to the gun equipped, and that allows you to obtain drops of a few microns, perfect for a widespread and uniform distribution of sanitizing liquid.

The ultrasonic atomizer is a highly sophisticated technique that exploits the power of sound waves that we humans cannot hear but is able to decompose the water and transform it into an aqueous mist to spread in the environment.

The compact and sliding design makes **SANI-MOVE** a particularly comfortable, efficient and functional product. Once the tank is loaded, all you need is to connect the power outlet and it is ready to use.

CONTACT US NOW FOR MORE INFORMATIONS.

ATTENTION: Follow the liquid manufacturer's instructions for sanitization/disinfection to be used. PNR Italia S.r.l. does not supply the liquid to be injected into the SANI-MOVE system and is not responsible for the effects of the liquid/solution used.

SANI-MOVE

FEATURES

EMPTY WEIGHT: 15 kg
WEIGHT AT LOAD: 24 kg
TROLLEY HEIGHT: 850 mm
WIDTH: 520 mm
DEPTH: 450 mm

TANK

Capacity 9 litri

ATOMIZER

Ultrasonic

COMPRESSOR

CAPACITY: 180 Nlitri/min
STORAGE TANK: 6 litri
POWER: 1kW
CONNECTION: 220V 50Hz

RECOMMENDED LIQUID

Sanitising/disinfectant liquid at customer's choice

OPERATING DATA

SUPPLY AIR PRESSURE: da 1 a 2 bar
AIR CONSUMPTION: 2.7 Nm³/h
LIQUID PRESSURE: 0.1 a 0.5 bar
LIQUID CONSUMPTION: 0.18 litri/min

Upon request, SANI-MOVE can be supplied with a protective metal front cover
