

UEA D020 (FULL CONE NOZZLES)

AIR BLOW-OFF NOZZLES · ROUND JET

UEA D020 compressed air blowing nozzles produce a powerful air jet concentrated on a well defined impact point. They are specially designed for deep and blind holes drying, produce lower noise and reduce pressure loss.

- Thread size 1/4"
- Thread specification BSP, NPT
- Material **V7** Aluminium, electroless nickel plated
B31 AISI 316L Stainless steel
- Typical applications Water removal from surfaces
Flocks and water blow off

- NOZZLE TYPE: UEA D020
- MATERIAL: **B31** - AISI 316L Stainless steel
LT: 400°C LP: 15 bar
V7 - Aluminium, electroless nickel plated
LT: 95°C LP: 15 bar
- THREAD CODES: **SG** - BSP (Female) • **MG** - BSP (Male)
SN - NPT (Female) • **MN** - NPT (Male)

These air blowers meet the requirements of American OSHA regulations

UEA 0525 / 0527 (AIR BLOWERS - FLAT FAN)

AIR BLOWERS - FLAT FAN

UEA series compressed air blowers are the best choice for operating environments requiring strong impact laminar sprays. The compressed air flow is blown through 16 orifices producing a strong impact jet, limited noise level and uniform spray. They are suitable to be installed on moving conveyors.

- Thread size 1/4"
- Thread specification BSPT, NPT
- Material **E31** Polyacetalic resin (POM)
V7 Aluminium, electroless nickel plated
